Junho Jeon

437-972-7845 | Junhojeon88@gmail.com | Toronto, ON | LinkedIn | Portfolio | GitHub Full-stack developer, graduating Aug 2026 – Applying Open Work Permit After Graduation.

Experience

Software Developer (Contract), Villen Technologies – Remote

Jun 2026 – Present

- Designed backend **scaling architecture** alongside founding team to ensure the product remains performant and stable during rapid user growth.
- Drafted technical proposals for AI features utilizing **structured prompts** and schema validation to gurantee reliable and predictable AI outputs.
- Contributed to the **security architecture**, planning how rate-limiting, input sanitization and secure authentication to **mitigate the early-stage app from common vulnerabilities**.

Full Stack Developer (Freelance), Café Princess – Toronto, ON

Feb 2026 – Jun 2026

- Worked directly with the owner to build a **customer-facing storefront** in React, TypeScript, and PostgreSQL, replacing printed menus.
- Built a **PostgreSQL Database admin portal** so staff could update menus and prices themselves, without needing a developer.
- Cut image sizes **roughly 90%** with WebP conversion, keeping the site within the client's hosting budget.

Mobile Application Developer (Freelance), Sunjin School – Gyeonggi-do, KR

Jun 2025 – Jul 2025

- Built a **Flutter app** used in classrooms to teach students how to buy tickets, find seats, and navigate a cinema.
- Gathered **accessibility requirements** from the school's special-education staff and built the app to meet them.

Projects

JobMatch | *TypeScript, Next.js, Node.js, OpenAI API, Zod*

- Used the **OpenAI API** to read resumes into a structured format, automatically retrying when the AI returned invalid data.
- Added **rate limiting and caching** to keep the tool running reliably at zero cost.
- Cut the time to tailor and submit a job application from **roughly 30 minutes to under a minute**.

Fragments Microservice | *Node.js, Express, AWS (Cognito, DynamoDB, S3), Docker*

- Built a **cloud service** on AWS that stores and converts files (text, JSON, and images) through a REST API.
- Secured it with **Amazon Cognito** logins; stored file data in S3 and its details in DynamoDB for fast lookups.
- Containerized with **Docker** and automated testing and deployment through **GitHub Actions**.

SmartStock | *TypeScript, Next.js, Tailwind, Flask API, JWT*

- Worked in a **4-person Agile team** to build a restaurant inventory app, splitting frontend and backend.
- Built the **Next.js frontend**, with role-based access control connecting it to a separate Flask backend for all data.

Gaming Laptop Recommender | *TypeScript, Next.js, Puppeteer, NoSQL*

- Built an automated scraper collecting live specs for **1,000+ gaming laptops** from major retailers.
- Kept **roughly 90% collection success** as retailer sites changed by using per-site configurations.

Skills

Languages: TypeScript, JavaScript, Python, Dart, SQL, HTML, CSS
Frontend & Mobile: React, Next.js, Tailwind, Flutter, Bootstrap
Backend & Databases: Node.js, Express, REST APIs, PostgreSQL (Supabase), DynamoDB, NoSQL **Cloud & DevOps:** AWS (Cognito, S3, DynamoDB), Docker, GitHub Actions, Vercel, Git **Practices & AI:** Agile/Scrum, CI/CD, Unit Testing, OpenAI API, LLMs, TensorFlow, Zod

Education

Seneca Polytechnic – Advanced Diploma, Computer Programming & Analysis — Sep 2023 – Aug 2026
