Experience

Software Developer (Contract), Villen Technologies – Remote
Jun 2026 – Present

- Built a **TypeScript** validation layer with **Zod** to check AI chatbot responses against a fixed schema, catching hallucinated and malformed output before it reached users.
- Implemented **Firebase Authentication** and **Vercel KV (Redis)** rate limiting to secure the app and block abusive traffic.
- Integrated **Sentry** error logging to surface production failures and cut debugging time on the early-stage app.

Full Stack Developer (Freelance), Café Princess – Toronto, ON
Feb 2026 – Jun 2026

- Built a customer-facing storefront in **React**, **TypeScript**, and **PostgreSQL (Supabase)**, replacing printed menus for roughly **100 daily customers**.
- Built a **Supabase** admin portal so staff could update menus and prices themselves without a developer.
- Cut image payload roughly **90%** by converting assets to **WebP**, speeding page loads for mobile customers.

Mobile Application Developer (Freelance), Sunjin School – Gyeonggi-do, KR
Jun 2025 – Jul 2025

- Built a classroom app in **Flutter** and **Dart** used by roughly **150 students** to practice buying tickets and finding seats in a simulated cinema.
- Built the interface to teacher-specified **accessibility** requirements so students with disabilities could navigate and locate seats independently.

Projects

JobMatch | *TypeScript, Next.js, Node.js, OpenAI API, Zod*
Demo

- Built a **Next.js** and **Node.js** app that parses resumes with the **OpenAI API**, validating output with **Zod** and retrying on invalid data.
- Automated resume tailoring and matching to cut application time from **roughly 30 minutes to under a minute**.

Fragments Microservice | *Node.js, Express, AWS (Cognito, DynamoDB, S3), Docker*
Github

- Built a **REST API** in **Node.js** and **Express** on **AWS** to store and convert files (text, JSON, and images).
- Secured access with **Amazon Cognito**, storing files in **S3** and metadata in **DynamoDB**.
- Containerized with **Docker** and automated testing and deployment with **GitHub Actions**.

SmartStock | *TypeScript, Next.js, Tailwind, Flask API, JWT*
Github

- Built a restaurant inventory app in a **4-person Agile team**, owning the **Next.js**, **TypeScript**, and **Tailwind** frontend.
- Added **JWT** role-based access control and connected the frontend to a **Python Flask REST API**.

Gaming Laptop Recommender | *TypeScript, Next.js, Puppeteer, NoSQL*
Github

- Built a **Puppeteer** scraper in **TypeScript** collecting live specs for **1,000+ gaming laptops** into a **NoSQL** database.
- Kept roughly **90%** scrape success as retailer sites changed by using per-site configurations.

Skills

Languages: TypeScript, JavaScript, Python, Dart, SQL, HTML, CSS

Frontend & Mobile: React, Next.js, Tailwind, Flutter, Bootstrap

Backend & Databases: Node.js, Express, REST APIs, PostgreSQL (Supabase), Firebase, Redis, DynamoDB, NoSQL

Cloud & DevOps: AWS (Cognito, S3, DynamoDB), Docker, GitHub Actions, Vercel, Sentry, Git

Practices & AI: Agile/Scrum, CI/CD, Unit Testing, OpenAI API, LLMs, TensorFlow, Zod

Education

Seneca Polytechnic – Advanced Diploma, Computer Programming & Analysis — Sep 2023 – Aug 2026
